

ISO/TS 29001 specifies Quality Management System requirements for the petroleum, petrochemical and natural gas industries. Its main aim is to enhance customer trust and confidence on daily operations through the effective application of the system, as well as the implementation of continual improvement processes, conformity assurance and regulatory requirements.

The oil and gas industry requires systematic, rigorous checks and any negligence could lead to huge, unrepairable losses. It is of crucial importance to have a Quality Management System in place that facilitates the monitoring of every operating procedure within the organization. ISO/TS 29001 PECB MS certification, therefore, is the path that ensures the desired quality in your organization.

ISO/TS 29001 **QUALITY MANAGEMENT** **FOR OIL & GAS INDUSTRY**

ISO/TS 29001 certification (also known as “registration”) is a third-party audit performed by a certification body such as MSEC. Once compliance with the requirements of ISO/TS 29001 is confirmed, MSEC issues an ISO/TS 29001 certificate to the organization. This certification is then maintained through regularly scheduled annual surveillance audits by the registrar, with re-certification of the Quality Management for Oil & Gas Industry performed on a triennial basis.

Benefits of ISO/TC 29001 Certification to your organization:

- Increased efficiency and revenue
- Improved supplier relationships
- Secure environment for your company
- Reduced product and supply chain waste
- Monitored performance and continual improvement
- International recognition

Benefits of ISO/TC 29001 Certification to your customers:

- Reduced complaints
- Ensure safety, quality and reliability
- Protection provision and enhanced integration
